

The event lifted a big impact in every one who was visited the exhibition and watched to charmed images of the universe and it's fascinating colors, and then the Giant Planet through the telescope, some of them said that this was most wonderful and interesting day in their life and it was a great experience to looking at Jupiter as

Galileo make it 400 years ago, and we are here very lucky to looking at this Jupiter also to listen and looking at the greatest facts and figures of the universe...It was really the day which was appeared on the logo of the IYA2009 (The Universe...Yours to Discover!).
